

iPod Touch/iPhone Apps – Useful for Geometry Class

Carmel Schettino

ASG 2009

Emma Willard School

FlashCard/Information/Formula Apps – These are just study aids, lists of formulas and theorems, etc. Not really facilitating learning, but useful for review.

Geometry Flash Facts Cards

MathRef

Math Formulas

Geometry – Deep Powder Software

AA+ Geometry Study Cards

Geometry Guide

Formulas Free

Input/Output Apps – These would be useful if you are having students practice problems and want them to find the answers to check. They would input the information given and see if they get the right answer from the application.

Formulas

Trigsolv

Trigonometry

Triangulator

Interactive Trigonometry Calculator***

Area Calculator*****

Geometry Puzzles/Games

Hexlok

TanZen

iPolygon

Tools

Graphing Calculator*

Vectorama**

iHandy Tools (Level, Bob, Protractor..)

iPocketDraw (the closest thing for the iPod to a dynamic geometry software package, but not even close)
